

# alooma

## DATA PIPELINE AS A SERVICE

*All your data sources together into BigQuery, Redshift, Snowflake and more.*

### Simple and Flexible

Set up and flow data in minutes or customize, enrich, and transform data on the stream before it even hits the data warehouse.

### Secure and Reliable

Never lose an event. Aloomo's ensure easy error handling without pausing your pipeline.

### ETL at Scale

Any number of data sources, from low to high volume, Aloomo's infrastructure scales to your needs.

# alooma

POWER YOUR DATA WITH ALOOMA

## End-to-end security

Every event is securely transferred to your data warehouse. Certified SOC2, HIPAA, and EU-US Privacy Shield.

## Any integration

Wherever your data lives, Aloomo can stream it by integrating with dozens of the most popular **data sources**.

## Never lose an event

Errors are caught in our **Restream Queues** so you never lose an event.

## Managed schema changes

When your data changes, Aloomo responds in real time to make sure you never lose an event.

## Mapping made easy

Get your data just **the way you want it**. Whether it's structured or semi-structured, static or changing.

## Pipeline transparency

View incoming events, monitor throughput and latency, and identify errors in real time.
