RENOVISOR

CLOUD COST

& PER-FOR-MANCE OPTIMIZATION

powered by aws

KEY FEATURES

OUR TECHNOLOGY

Renovisor empowers financial and accounting teams with detailed insights into cost and usage data. Drive financial accountability, optimize costs, track goals, implement governance best practices, and achieve operational excellence.

- Easy Access to cost and usage data.

- AI-Powered Assistant using natural language processing.

- Real-time Financial Tracking for CFOs and management.

WHAT SETS RENOVISOR APART?

- Easy to Use: Clear, concise summaries for each AWS service, making financial tracking simple.

- Secure: IAM support, no agent installations, data privacy maintained within your organization.

- Comprehensive: Hundreds of pre-built visualizations, resource-level details, and AI-driven insights.

- Cost-Effective: Only pay for what you use.

- Amazon Q Integration: AI assistant for summaries, content generation, and secure enterprise tasks.

PLATFORM CAPABILITIES

1. Billing Summary: Visuals that categorize expenses and forecast future costs.

2. MoM Pivot: Track month-over-month spending trends.

3. OPTICS Explorer: Ad hoc query tool for deep cost and usage insights.

4. Budget vs. Actual Tracking: One-click comparison of budgeted vs. actual spending.

5. Reserved Instance & Savings Plan Summary: Track savings and expiring options.

6. Usage Cost Summary: Key visuals on top services costs and anomaly detection.

7. Compute Summary: KPIs and optimization opportunities for AWS Compute services.

8. Storage Summary: Cost and performance tracking for Amazon S3 and EBS.
